Bio-inspired Computation in Unmanned Aerial Vehicles

Haibin Duan, Pei Li

Bio-inspired Computation in Unmanned Aerial Vehicles Haibin Duan, Pei Li

Bio-inspired Computation in Unmanned Aerial Vehicles focuses on the aspects of path planning, formation control, heterogeneous cooperative control and vision-based surveillance and navigation in Unmanned Aerial Vehicles (UAVs) from the perspective of bio-inspired computation. It helps readers to gain a comprehensive understanding of control-related problems in UAVs, presenting the latest advances in bio-inspired computation.

By combining bio-inspired computation and UAV control problems, key questions are explored in depth, and each piece is content-rich while remaining accessible. With abundant illustrations of simulation work, this book links theory, algorithms and implementation procedures, demonstrating the simulation results with graphics that are intuitive without sacrificing academic rigor. Further, it pays due attention to both the conceptual framework and the implementation procedures.

The book offers a valuable resource for scientists, researchers and graduate students in the field of Control, Aerospace Technology and Astronautics, especially those interested in artificial intelligence and Unmanned Aerial Vehicles.

Professor **Haibin Duan** and Dr. **Pei Li**, both work at Beihang University (formerly Beijing University of Aeronautics & Astronautics, BUAA). Prof Duan's academic website is: <http://hbduan.buaa.edu.cn>

From reader reviews:

James Sellers:

Throughout other case, little persons like to read book Bio-inspired Computation in Unmanned Aerial Vehicles. You can choose the best book if you'd prefer reading a book. Provided that we know about how is important the book Bio-inspired Computation in Unmanned Aerial Vehicles. You can add expertise and of course you can around the world by just a book. Absolutely right, mainly because from book you can know everything! From your country until finally foreign or abroad you may be known. About simple matter until wonderful thing you could know that. In this era, we are able to open a book or maybe searching by internet product. It is called e-book. You can use it when you feel bored to go to the library. Let's study.

Blake Nixon:

In this 21st centuries, people become competitive in every single way. By being competitive at this point, people have do something to make these survives, being in the middle of often the crowded place and notice by surrounding. One thing that at times many people have underestimated this for a while is reading. Sure, by reading a publication your ability to survive enhance then having chance to stand than other is high. For yourself who want to start reading a new book, we give you this specific Bio-inspired Computation in Unmanned Aerial Vehicles book as beginning and daily reading guide. Why, because this book is greater than just a book.

Pamela Eckert:

The book untitled Bio-inspired Computation in Unmanned Aerial Vehicles contain a lot of information on the item. The writer explains the woman idea with easy way. The language is very clear to see all the people, so do not necessarily worry, you can easy to read the idea. The book was compiled by famous author. The author provides you in the new time of literary works. You can actually read this book because you can keep reading your smart phone, or program, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site in addition to order it. Have a nice read.

Brant Castillo:

What is your hobby? Have you heard that will question when you got college students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And you know that little person including reading or as looking at become their hobby. You have to know that reading is very important as well as book as to be the thing. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You get good news or update regarding something by book. Numerous books that can you choose to adopt be your object. One of them is this Bio-inspired Computation in Unmanned Aerial Vehicles.
