## **Cells For Kids (Science Book For Children)** Nishi Singh

**Cells** are the building blocks of all living things. They are called "cells" because **Robert Hooke**, the person who discovered the cells when looking under the microscope thought that it looked like the "empty rooms" of a monastery where monks used to sleep in.

Biology is the study of living organisms and the research of the science behind living things. Biology is the core that unites all other disciplines and sub-disciplines of biological science. This starts with the understanding of the cell. Hence, the study of biology is vital for our children.

This book, "**Cells For Kids**" is a book designed for children with diagrams so that they can learn everything about animal and plant cells from the start. As parents, we must ingrain their minds and awaken their curiosity so that they can be ready for this complex and rapidly evolving subject area.

Most biology books, be it for children or adults start with a chapter on the cell. It is here that all biological processes take place. Hence it is vital that we as parents, teach our children about the cell as early as possible. Some may be able to learn while some may not but at least it's a step in the right direction.

I wrote this book for my own children and I can see that they are now curious about what a cell is and what exactly it does? Half of my job is done; this will save me a lot of heartache later on when I am trying to teach them **biology**. My ultimate aim would be to get them to **study science** when they grow up and this book would be one of their stepping stones. Study of biology will prepare children for a range of careers where they can make a difference in the world.

Here's what's covered in this **book about cells**. I have included questions after some chapters for parents to ask to ensure kids are learning before moving on to the next chapter. There is a quiz at the end of the book.

The chapters:

- 1. What is a cell? (This chapter defines what a cell is)
- 2. Who discovered the cell? (Describes exactly how Robert Hooke discovered the cell and what he saw under the microscope)
- 3. What are cells made of? (Describes what the cell is made of - organelles and cytoplasm)
- 4. Why cells are mostly made of water? (A good question and a difficult one to answer)
- 5. How big is a cell? (Cells come in different shapes and sizes - get to learn the size of the cell)
- 6. How many cells are in the human body? (The body is made of cells and children will learn how many cells we have)
- 7. How many different types of cells are there? (Learn about the different types of cells namely; eukaryotic and prokaryotic cells)
- 8. The animal cell (Learn about the animal cell and its various structures with a labelled diagram)
- 9. Parts and organelles of animal cells (Describes each organelles of the animal cells)
- 10. The plant cell (Learn about plant cells with a labelled diagram)
- 11. The parts and organelles of plant cells (Describes parts and organelles of the plant cells)
- 12. Animal cells and plant cells - The Difference (Goes through the many differences between the animal and plant cells)

- 13. What are tissues, organs and organ systems? (Cells form tissues, which then form organs and then organs systems)
- 14. Cellular division - Cell cycle (There are two types of cells (1) Mitosis and (2) Meiosis)
- 15. 10 facts about the cell (Some facts about the cell)
- 16. Quiz - What can you remember? (A quiz at the end of the book)

### **From reader reviews:**

#### **Nancy Lowery:**

What do you about book? It is not important to you? Or just adding material when you need something to explain what yours problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make you feel bored faster. And you have time? What did you do? Every person has many questions above. The doctor has to answer that question since just their can do that. It said that about book. Book is familiar on every person. Yes, it is suitable. Because start from on guardería until university need that Cells For Kids (Science Book For Children) to read.

#### **Martin McDaniel:**

The reserve untitled Cells For Kids (Science Book For Children) is the publication that recommended to you to learn. You can see the quality of the publication content that will be shown to anyone. The language that author use to explained their way of doing something is easily to understand. The article writer was did a lot of analysis when write the book, to ensure the information that they share for you is absolutely accurate. You also might get the e-book of Cells For Kids (Science Book For Children) from the publisher to make you more enjoy free time.

#### **Travis Hargrove:**

Many people spending their moment by playing outside having friends, fun activity using family or just watching TV 24 hours a day. You can have new activity to enjoy your whole day by reading a book. Ugh, do you think reading a book can actually hard because you have to use the book everywhere? It alright you can have the e-book, getting everywhere you want in your Smart phone. Like Cells For Kids (Science Book For Children) which is having the e-book version. So , try out this book? Let's view.

#### **Randy Champion:**

That publication can make you to feel relax. This kind of book Cells For Kids (Science Book For Children) was multi-colored and of course has pictures on there. As we know that book Cells For Kids (Science Book For Children) has many kinds or genre. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and think that you are the character on there. Therefore , not at all of book are usually make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for you and try to like reading that.
