**Forensic Chemistry: Fundamentals and Applications (Forensic Science in Focus)** Jay Siegel

**Forensic Chemistry** is a comprehensive overview of the subject aimed at those students who have a basic understanding of the underlying principles and are looking for a more detailed reference text. This book is aimed at advanced students who are studying forensic science or analytical chemistry, faculty and researchers, and practitioners such as crime laboratory bench scientists. The authors will assume that the reader will have an introductory knowledge of forensic science and forensic chemistry and will have had analytical, organic and instrumental chemistry. None of the major analytical chemical techniques will have separate treatments in the book, with the exception of forensic microscopy, which will have a chapter because many students in chemistry and forensic science do not get dedicated classes in this area. The book will have separate chapters on all of the major areas of forensic chemistry and, in addition, will have a chapter devoted to chemometrics, which is the statistical treatment of large amounts of data to discover groupings, similarities and differences among the data. Each chapter will be written by an acknowledged international expert in that area. Each author will be given detailed instructions as to the intended audience, as well as expected breadth and depth of coverage of the material in the hopes that this will minimize the problem of uneven coverage of topics and chapters that often occurs in edited books. Although each of the types of evidence covered in the book use methods of analysis that lie outside chemistry, these will be mentioned only for completeness in passing. The emphasis will be on the use of chemical tools in evidence analysis. This book is designed to be either a text book for an advanced forensic chemistry course, or a treatise in forensic chemistry for the scientist who wants to learn the subject in some depth. It is not designed to be a survey of the current literature in the field or a reference manual.

### **From reader reviews:**

#### **Nathan Wilson:**

Book is definitely written, printed, or highlighted for everything. You can know everything you want by a guide. Book has a different type. To be sure that book is important issue to bring us around the world. Beside that you can your reading expertise was fluently. A publication Forensic Chemistry: Fundamentals and Applications (Forensic Science in Focus) will make you to end up being smarter. You can feel more confidence if you can know about almost everything. But some of you think which open or reading a new book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you in search of best book or ideal book with you?

#### **Dolly Taylor:**

Spent a free the perfect time to be fun activity to perform! A lot of people spent their sparetime with their family, or all their friends. Usually they accomplishing activity like watching television, gonna beach, or picnic from the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? Can be reading a book is usually option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the guide untitled Forensic Chemistry: Fundamentals and Applications (Forensic Science in Focus) can be excellent book to read. May be it may be best activity to you.

#### **Douglas Moskowitz:**

A lot of people always spent their free time to vacation or even go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. In order to try to find a new activity that is look different you can read a book. It is really fun for yourself. If you enjoy the book that you read you can spent 24 hours a day to reading a book. The book Forensic Chemistry: Fundamentals and Applications (Forensic Science in Focus) it is rather good to read. There are a lot of folks that recommended this book. These people were enjoying reading this book. When you did not have enough space to create this book you can buy the particular e-book. You can m0ore very easily to read this book through your smart phone. The price is not to fund but this book offers high quality.

#### **Mary May:**

Are you kind of hectic person, only have 10 or even 15 minute in your day time to upgrading your mind ability or thinking skill also analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short time to read it because all of this time you only find book that need more time to be learn. Forensic Chemistry: Fundamentals and Applications (Forensic Science in Focus) can be your answer because it can be read by an individual who have those short extra time problems.
