Shocking Electrons: What a Second Grader Finds Interesting about Electrons, Atoms, and Molecules

Aiden James Evans, Donna Evans

Aiden James Evans, a second grader in Virginia, writes about what he finds interesting about electrons and atoms. He includes "shocking" stories of static electricity, explaining why you feel a shock when you touch a doorknob. Also included is some hair-raising facts about balloons, atoms, and the periodic table of elements as well as fun facts about the first ten elements. This e-book is a perfect introduction to chemistry for children in grades 2-4 or for anyone who has never had chemistry.

Susan Tarin:

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library as well as to make summary for some publication, they are complained. Just minor students that has reading's heart or real their hobby. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that examining is not important, boring along with can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Shocking Electrons: What a Second Grader
