Jacqueline N. Crawley

**What's Wrong With My Mouse: Behavioral Phenotyping of Transgenic and Knockout Mice** Jacqueline N. Crawley

Dr. Jacqueline N. Crawley, author of the First and Second Editions of *What's Wrong with My Mouse? Behavioral Phenotyping of Transgenic and Knockout Mice*, continues to field calls and e-mails from molecular geneticists who ask: *how do I run behavioral assays to find out what's wrong with my mouse?*

Turn to *What's Wrong with My Mouse?* to discover the wealth of mouse behavioral tasks and to get the guidance you need to select the best methods and necessary controls. Chapters are organized by behavioral domain, including measurements of general health, motor functions, sensory abilities, learning and memory, feeding and drinking, reproductive, social, emotional, and reward behaviors in mutant mice. Throughout the chapters, new behavioral tasks and new research discoveries have been added, bringing the Second Edition up to date with the latest science. In addition, the Second Edition includes two new chapters:

"Neurodevelopment and Neurodegeneration" discusses mouse behavioral tasks relevant to neurodevelopmental diseases, such as mental retardation and autism, and to neurodegenerative diseases, such as Alzheimers, Parkinsons, Huntingtons, and amyotrophic lateral sclerosis.

"Putting It All Together" recommends strategies for optimizing a battery of behavioral phenotyping tests to address your specific hypotheses about gene functions.

The final chapter, "The Next Generation," examines new and emerging technologies.

Throughout the book, the use of behavioral testing equipment is illustrated with photographs, diagrams, and representative data. Examples of behavioral tasks successfully applied to transgenic and knockout mouse models are provided, as well as references to the primary literature and step-by-step methods protocols. These features, along with a comprehensive index, listings of database and vendor websites, and an extensive list of references, make this book a valuable and practical resource for students and researchers.

### **From reader reviews:**

#### **David Marx:**

What do you regarding book? It is not important together with you? Or just adding material when you want something to explain what the one you have problem? How about your time? Or are you busy man? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Everybody has many questions above. They have to answer that question since just their can do this. It said that about publication. Book is familiar in each person. Yes, it is appropriate. Because start from on pre-school until university need that What's Wrong With My Mouse: Behavioral Phenotyping of Transgenic and Knockout Mice to read.

#### **David Goodspeed:**

The reserve with title What's Wrong With My Mouse: Behavioral Phenotyping of Transgenic and Knockout Mice has a lot of information that you can find out it. You can get a lot of benefit after read this book. This particular book exist new information the information that exist in this publication represented the condition of the world currently. That is important to yo7u to learn how the improvement of the world. This book will bring you inside new era of the internationalization. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

#### **Jose Williams:**

Playing with family within a park, coming to see the coastal world or hanging out with good friends is thing that usually you could have done when you have spare time, in that case why you don't try issue that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love What's Wrong With My Mouse: Behavioral Phenotyping of Transgenic and Knockout Mice, you may enjoy both. It is good combination right, you still would like to miss it? What kind of hang-out type is it? Oh come on its mind hangout guys. What? Still don't understand it, oh come on its called reading friends.

#### **Randy Champion:**

Your reading 6th sense will not betray anyone, why because this What's Wrong With My Mouse: Behavioral Phenotyping of Transgenic and Knockout Mice publication written by well-known writer who really knows well how to make book which can be understand by anyone who have read the book. Written with good manner for you, leaking every ideas and producing skill only for eliminate your own hunger then you still doubt What's Wrong With My Mouse: Behavioral Phenotyping of Transgenic and Knockout Mice as good book but not only by the cover but also with the content. This is one book that can break don't ascertain book by its protect, so do you still needing another sixth sense to pick that!/? Oh come on your looking at sixth sense already told you so why you have to listening to one more sixth sense.
