Egyptian Cosmology: The Animated Universe - Second Edition

Moustafa Gadalla

Egyptian Cosmology: The Animated Universe - Second Edition Moustafa Gadalla

Egyptian cosmology is humanistic, coherent, comprehensive, consistent, logical, analytical, and rational.

This book is informative and well written, so that the whole spectrum of readers--from the serious to the casual--will find the subjects enlightening.

The book surveys the applicability of Egyptian cosmological concepts to our modern understanding of the nature of the universe, creation, science, and philosophy, such as:

- The Egyptians' expression of monotheistic mysticism.
- The Big Bang that started the universe, as described in the Egyptian Texts.
- The numerical codes of creation.
- The Egyptian concept of the universal energy matrix, how the social and political structures were a reflection of the universe, and the interactions between the nine universal realms, ...etc.
- The Egyptians' perpetual cosmic consciousness - *As Above, So Below and As Below, So Above* - and its applications to man and society.
- The Big Crunch would end the universe, and the Big Bounce would start creation all over again, as foretold in the Egyptian Texts.
