Cellular Neural Networks and Visual Computing: Foundations and Applications

Leon O. Chua, Tamas Roska

Cellular Neural Networks and Visual Computing: Foundations and Applications

Leon O. Chua, Tamas Roska

Cellular Neural Networks and Visual Computing: Foundations and Applications Leon O. Chua, Tamas Roska

Cellular Nonlinear/Neural Network (CNN) technology is both a revolutionary concept and an experimentally proven new computing paradigm. Analogic cellular computers based on CNNs are set to change the way analog signals are processed. This unique undergraduate level textbook includes many examples and exercises, including CNN simulator and development software accessible via the Internet. It is an ideal introduction to CNNs and analogic cellular computing for students, researchers and engineers from a wide range of disciplines. Leon Chua, co-inventor of the CNN, and Tamàs Roska are both highly respected pioneers in the field.

From reader reviews:

Winston Nakashima:

The e-book with title Cellular Neural Networks and Visual Computing: Foundations and Applications contains a lot of information that you can understand it. You can get a lot of benefit after read this book. This specific book exist new understanding the information that exist in this book represented the condition of the world right now. That is important to yo7u to understand how the improvement of the world. This specific book will bring you inside new era of the syndication. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Armando Rodgers:

People live in this new time of lifestyle always aim to and must have the free time or they will get lot of stress from both everyday life and work. So , when we ask do people have free time, we will say absolutely without a doubt. People is human not only a robot. Then we question again, what kind of activity have you got when the spare time coming to you of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative throughout spending your spare time, the particular book you have read is usually Cellular Neural Networks and Visual Computing: Foundations and Applications.

Walter Crouse:

Reading a book to become new life style in this 12 months; every people loves to learn a book. When you examine a book you can get a large amount of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your review, you can read education books, but if you act like you want to entertain yourself read a fiction books, these us novel, comics, and also soon. The Cellular Neural Networks and Visual Computing: Foundations and Applications provide you with a new experience in studying a book.

Harry Alvey:

As we know that book is significant thing to add our information for everything. By a book we can know everything we want. A book is a pair of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This guide Cellular Neural Networks and Visual Computing: Foundations and Applications was filled concerning science. Spend your free time to add your knowledge about your scientific research competence. Some people has several feel when they reading a book. If you know how big benefit from a book, you can really feel enjoy to read a guide. In the modern era like today, many ways to get book which you wanted.
