Health, Medicine and Society: Key Theories, Future Agendas

Taking as its point of departure recent developments in health and social theory *Health, Medicine and Society* brings together a range of eminent, international scholars to reflect upon key issues at the turn of the century.

Contributors draw upon a range of contemporary theories, both modernist and postmodernist, to look at the following themes:

- *health and social structure
- *the contested nature of the body
- *the salience of consumption and risk
- *the challenge of emotions

Health, Medicine and Society provides a 'state-of-the-art' assessment of health related issues at the millennium and a cogent set of arguments for the centrality of health to contemporary social theory. Written in a clear, accessible style it will be ideal reading for students and researchers in health studies, public health, medical sociology, medicine and nursing.
