Fei Long

Satellite Network Robust QoS-aware Routing Fei Long

Satellite Network Robust QoS-aware Routing presents a novel routing strategy for satellite networks. This strategy is useful for the design of multi-layered satellite networks as it can greatly reduce the number of time slots in one system cycle. The traffic prediction and engineering approaches make the system robust so that the traffic spikes can be handled effectively. The multi-QoS optimization routing algorithm can satisfy various potential user requirements. Clear and sufficient illustrations are also presented in the book. As the chapters cover the above topics independently, readers from different research backgrounds in constellation design, multi-QoS routing, and traffic engineering can benefit from the book.

Fei Long is a senior engineer at Beijing R&D Center of 54th Research Institute of China Electronics Technology Group Corporation.

From reader reviews:

Micheal Clothier:

As people who live in the modest era should be change about what going on or details even knowledge to make these people keep up with the era and that is always change and progress. Some of you maybe can update themselves by studying books. It is a good choice for yourself but the problems coming to a person is you don't know what one you should start with. This Satellite Network Robust QoS-aware Routing is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

Mike Yerkes:

Playing with family within a park, coming to see the marine world or hanging out with friends is thing that usually you could have done when you have spare time, in that case why you don't try matter that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Satellite Network Robust QoS-aware Routing, it is possible to enjoy both. It is fine combination right, you still wish to miss it? What kind of hang-out type is it? Oh can occur its mind hangout fellas. What? Still don't get it, oh come on its identified as reading friends.

Tony Jacobson:

Are you kind of busy person, only have 10 or perhaps 15 minute in your time to upgrading your mind expertise or thinking skill also analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your short time to read it because this time you only find book that need more time to be go through. Satellite Network Robust QoS-aware Routing can be your answer mainly because it can be read by you actually who have those short spare time problems.

Janet Baltimore:

What is your hobby? Have you heard this question when you got scholars? We believe that that concern was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. And you know that little person like reading or as examining become their hobby. You need to understand that reading is very important along with book as to be the factor. Book is important thing to provide you knowledge, except your teacher or lecturer. You will find good news or update in relation to something by book. Amount types of books that can you decide to try be your object. One of them is Satellite Network Robust QoS-aware Routing.
