Autonomous Vehicles in Support of Naval Operations Committee on Autonomous Vehicles in Support of Naval Operations, Naval Studies Board, Division on Engineering and Physical Sciences, National Research Council

Autonomous vehicles (AVs) have been used in military operations for more than 60 years, with torpedoes, cruise missiles, satellites, and target drones being early examples.¹ They have also been widely used in the civilian sector--for example, in the disposal of explosives, for work and measurement in radioactive environments, by various offshore industries for both creating and maintaining undersea facilities, for atmospheric and undersea research, and by industry in automated and robotic manufacturing.

Recent military experiences with AVs have consistently demonstrated their value in a wide range of missions, and anticipated developments of AVs hold promise for increasingly significant roles in future naval operations. Advances in AV capabilities are enabled (and limited) by progress in the technologies of computing and robotics, navigation, communications and networking, power sources and propulsion, and materials.

Autonomous Vehicles in Support of Naval Operations is a forward-looking discussion of the naval operational environment and vision for the Navy and Marine Corps and of naval mission needs and potential applications and limitations of AVs. This report considers the potential of AVs for naval operations, operational needs and technology issues, and opportunities for improved operations.

From reader reviews:

Jerry Day:

In this 21st century, people become competitive in every single way. By being competitive today, people have to do something to make all of them survive, being in the middle of the actual crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. Sure, by reading a reserve your ability to survive improve then having chance to stand up than other is high. For you personally who want to start reading the book, we give you that Autonomous Vehicles in Support of Naval Operations book as starter and daily reading reserve. Why, because this book is more than just a book.

Bonnie Boyd:

Now a day people that Living in the era exactly where everything reachable by connect with the internet and the resources within it can be true or not call for people to be aware of each data they get. How a lot more to be smart in having any information nowadays? Of course the answer then is reading a book. Reading through a book can help folks out of this uncertainty Information specifically this Autonomous Vehicles in Support of Naval Operations book because book offers you rich details and knowledge. Of course the knowledge in this book hundred percent guarantees there is no doubt in it as you know.

Vicky Bowman:

Often the book Autonomous Vehicles in Support of Naval Operations has a lot of knowledge on it. So when you make sure to read this book you can get a lot of benefit. The book was compiled by the very famous author. The writer makes some research ahead of write this book. This kind of book very easy to read you can obtain the point easily after looking over this book.

Amy Mueller:

Beside this Autonomous Vehicles in Support of Naval Operations in your phone, it can give you a way to get closer to the new knowledge or info. The information and the knowledge you might got here is fresh from your oven so don't be worry if you feel like an aged people live in narrow commune. It is good thing to have Autonomous Vehicles in Support of Naval Operations because this book offers to you personally readable information. Do you sometimes have book but you seldom get what it's interesting features of. Oh come on, that won't happen if you have this in your hand. The Enjoyable arrangement here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss that? Find this book and read it from at this point!
