Corrosion Science and Technology (Materials Science & Technology)

David E.J. Talbot, James D.R. Talbot

Corrosion Science and Technology (Materials Science & Technology) David E.J. Talbot, James D.R. Talbot

Although they often appear to be permanent, metals are unstable in their service environments and are susceptible to degradation by corrosion. Corrosion occurs when protective mechanisms have been overlooked, break down, or have been exhausted, leaving the metal vulnerable to attack by hostile environments. Control of corrosion is essential in a wide variety of industries. It is of concern to materials scientists and engineers, yet both students and professionals often cannot assimilate the information they need in typical corrosion-related literature because they do not have the specialized background these sources assume. Corrosion Science and Technology clarifies this important background material and guides readers in its practical application.

This text integrates the chemical, electrochemical, and metallurgical aspects of corrosion control for application in typical contemporary technologies with economical use of resources. The structures of water, oxides, and metals are examined to identify the interactions by which metals can corrode in natural and relevant artificial environments. The book describes the characteristics of metals and alloys often specified for corrosion-resistant service, and discusses the relative merits of various protective measures and the strategies available to control corrosion. Corrosion Science and Technology profiles aviation, automobile manufacture, food processing, and building construction to show how these sample industries currently address corrosion issues.

Written from long experience of both teaching and practice in the field, this book includes explanations of scientific principles and real world applications and case histories. Extensive information on additional corrosion-related literature is provided to guide readers to sources of more specific information. Corrosion Science and Technology gives readers a solid foundation on which to understand and apply corrosion control measures and to comprehend and use information from other sources.

From reader reviews:

Christopher Mills:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each e-book has different aim as well as goal; it means that book has different type. Some people experience enjoy to spend their the perfect time to read a book. These are reading whatever they have because their hobby is actually reading a book. Consider the person who don't like studying a book? Sometime, man or woman feel need book whenever they found difficult problem or maybe exercise. Well, probably you will need this Corrosion Science and Technology (Materials Science & Technology).

Nettie Powers:

Do you one of people who can't read pleasurable if the sentence chained in the straightway, hold on guys this aren't like that. This Corrosion Science and Technology (Materials Science & Technology) book is readable through you who hate the straight word style. You will find the facts here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to supply to you. The writer regarding Corrosion Science and Technology (Materials Science & Technology) content conveys objective easily to understand by lots of people. The printed and e-book are not different in the articles but it just different such as it. So , do you continue to thinking Corrosion Science and Technology (Materials Science & Technology) is not loveable to be your top collection reading book?

Shelly Reder:

Is it anyone who having spare time and then spend it whole day by means of watching television programs or just resting on the bed? Do you need something totally new? This Corrosion Science and Technology (Materials Science & Technology) can be the response, oh how comes? It's a book you know. You are consequently out of date, spending your extra time by reading in this completely new era is common not a geek activity. So what these guides have than the others?

Teresa Randall:

In this era which is the greater man or who has ability in doing something more are more precious than other. Do you want to become one among it? It is just simple approach to have that. What you need to do is just spending your time little but quite enough to get a look at some books. On the list of books in the top record in your reading list is Corrosion Science and Technology (Materials Science & Technology). This book which can be qualified as The Hungry Inclines can get you closer in becoming precious person. By looking upward and review this e-book you can get many advantages.
