A cancer diagnosis always causes fear. Most of us have seen relatives and friends destroyed by conventional cancer treatment. Now, thanks to a new wealth of information, you can heal cancer using natural, nontoxic substances that work. What you need is a guide to cut through the jungle of information. This book (in its third edition) provides that guide. The author is not a medical professional but a researcher who has been refining this information for over eight years using feedback from real cancer survivors about what worked for them. At least 1,500 of the cancer patients he has counseled have recovered using his information. The self-treatments he recommends are harmless enough that you can start them immediately, and if you choose to pursue conventional cancer therapy, they will not interfere with that treatment but will help to offset most of its side effects.
