Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education) Michiel van Eijck, Wolff-Michael Roth

Researchers agree that schools construct a *particular* image of science, in which some characteristics are featured while others end up in oblivion. The result is that although most children are likely to be familiar with images of heroic scientists such as Einstein and Darwin, they rarely learn about the messy, day-to-day practice of science in which scientists are ordinary humans. Surprisingly, the process by which this imagination of science in education occurs has rarely been theorized. This is all the more remarkable since great thinkers tend to agree that the formation of images ? imagination ? is at the root of how human beings modify their material world. Hence this process in school science is fundamental to the way in which scientists, being the successful agents in/of science education, actually create their own scientific enterprise once they take up their professional life.

One of the first to examine the topic, this book takes a theoretical approach to understanding the process of imagining science in education. The authors utilize a number of interpretive studies in both science and science education to describe and contrast two opposing forces in the imagination of science in education: epicization and novelization. Currently, they argue, the imagination of science in education is dominated by epicization, which provides an absolute past of scientific heroes and peak discoveries. This opens a distance between students and today's scientific enterprises, and contrasts sharply with the wider aim of science education to bring the actual world of science closer to students.

To better understand how to reach this aim, the authors offer a detailed look at novelization, which is a continuous renewal of narratives that derives from dialogical interaction. The book brings together two hitherto separate fields of research in science education: psychologically informed research on students' images of science and semiotically informed research on images of science in textbooks. Drawing on a series of studies in which children participate in the imagination of science in and out of the classroom, the authors show how the process of novelization actually occurs in the practice of education and outline the various images of science this process ultimately yields.

From reader reviews:

Fern Rodriquez:

With other case, little people like to read book Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education). You can choose the best book if you'd prefer reading a book. As long as we know about how is important a new book Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education). You can add knowledge and of course you can around the world by just a book. Absolutely right, since from book you can learn everything! From your country until foreign or abroad you can be known. About simple factor until wonderful thing you can know that. In this era, we can easily open a book or maybe searching by internet device. It is called e-book. You should use it when you feel uninterested to go to the library. Let's examine.

Jonathan Woods:

The book Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education) can give more knowledge and information about everything you want. Why must we leave a very important thing like a book Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education)? Several of you have a different opinion about publication. But one aim this book can give many details for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or data that you take for that, it is possible to give for each other; you can share all of these. Book Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education) has simple shape nevertheless, you know: it has great and large function for you. You can look the enormous world by open and read a reserve. So it is very wonderful.

Rana Jensen:

Book is to be different for each and every grade. Book for children till adult are different content. As you may know that book is very important usually. The book Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education) has been making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The e-book Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education) is not only giving you much more new information but also to become your friend when you experience bored. You can spend your personal spend time to read your guide. Try to make relationship while using book Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education). You never truly feel lose out for everything in case you read some books.

Wayne Robinson:

Typically the book Imagination of Science in Education: From Epics to Novelization (Cultural Studies of Science Education) has a lot of knowledge on it. So when you read this book you can get a lot of advantage. The book was published by the very famous author. The writer makes some research before write this book.

This specific book very easy to read you can find the point easily after scanning this book.
