College Algebra: Graphs & Models

John Coburn, J.D. (John) Herdlick

College Algebra: Graphs & Models John Coburn, J.D. (John) Herdlick

Three components contribute to a theme sustained throughout the Coburn-Herdlick Series: that of laying a firm foundation, building a solid framework, and providing strong connections. In the Graphs and Models texts, the authors combine their depth of experience with the conversational style and the wealth of applications that the Coburn-Herdlick texts have become known for. By combining a graphical approach to problem solving with algebraic methods, students learn how to relate their mathematical knowledge to the outside world. The authors use technology to solve the more true-to life equations, to engage more applications, and to explore the more substantial questions involving graphical behavior. Benefiting from the feedback of hundreds of instructors and students across the country, College Algebra: Graphs & Models emphasizes connections in order to improve the level of student engagement in mathematics and increase their chances of success in college algebra.

The launch of the Coburn/Herdlick Graphs and Models series provides a significant leap forward in terms of online course management with McGraw-Hill's new homework platform, Connect Math Hosted by ALEKS Corp. Math instructors served as digital contributors to choose the problems that will be available, authoring each algorithm and providing stepped out solutions that go into great detail and are focused on areas where students commonly make mistakes. From there, the ALEKS Corporation reviewed each algorithm to ensure accuracy. A unifying theme throughout the entire process was the involvement of the authors. Through each step, they provided feedback and guidance to the digital contributors to ensure that the content being developed digitally closely matched the textbook. The result is an online homework platform that provides superior content and feedback, allowing students to effectively learn the material being taught.

From reader reviews:

Ruth Irizarry:

A lot of people always spent their very own free time to vacation or even go to the outside with them family or their friend. Do you realize? Many a lot of people spent they free time just watching TV, or playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read a book. It is really fun for you personally. If you enjoy the book which you read you can spent all day long to reading a guide. The book College Algebra: Graphs & Models it is extremely good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. If you did not have enough space to deliver this book you can buy typically the e-book. You can m0ore effortlessly to read this book out of your smart phone. The price is not too expensive but this book has high quality.

Ralph Dell:

Are you kind of occupied person, only have 10 or perhaps 15 minute in your moment to upgrading your mind talent or thinking skill also analytical thinking? Then you are having problem with the book than can satisfy your small amount of time to read it because all of this time you only find publication that need more time to be learn. College Algebra: Graphs & Models can be your answer mainly because it can be read by an individual who have those short free time problems.

Cynthia Haynes:

Is it an individual who having spare time and then spend it whole day through watching television programs or just laying on the bed? Do you need something totally new? This College Algebra: Graphs & Models can be the reply, oh how comes? A book you know. You are thus out of date, spending your extra time by reading in this new era is common not a geek activity. So what these ebooks have than the others?

Josephine Draughn:

Do you like reading a publication? Confuse to looking for your preferred book? Or your book seemed to be rare? Why so many concern for the book? But just about any people feel that they enjoy intended for reading. Some people likes studying, not only science book and also novel and College Algebra: Graphs & Models or maybe others sources were given understanding for you. After you know how the great a book, you feel desire to read more and more. Science book was created for teacher as well as students especially. Those ebooks are helping them to bring their knowledge. In additional case, beside science publication, any other book likes College Algebra: Graphs & Models to make your spare time considerably more colorful. Many types of book like here.
