Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine)

Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine)

Research and development in the pharmaceutical industry is a time-consuming and expensive process, making it difficult for newly developed drugs to be formulated into commercially available products. Both formulation and process development can be optimized by means of statistically organized experiments, artificial intelligence and other computational methods. Simultaneous development and investigation of pharmaceutical products and processes enables application of quality by design concept that is being promoted by the regulatory authorities worldwide. Computer-aided applications in pharmaceutical technology covers the fundamentals of experimental design application and interpretation in pharmaceutical technology, chemometric methods with emphasis of their application in process control, neural computing (artificial neural networks, fuzzy logic and decision trees, evolutionary computing and genetic algorithms, self-organizing maps), computer-aided biopharmaceutical characterization as well as application of computational fluid dynamics in pharmaceutical technology. All of these techniques are essential tools for successful building of quality into pharmaceutical products and processes from the early stage of their development to selection of the optimal ones. In addition to theoretical aspects of various methods, the book provides numerous examples of their application in the field of pharmaceutical technology.

- A comprehensive review of the current state of the art on various computer aided applications in pharmaceutical technology
- Case studies are presented in order to facilitate understanding of various concepts in computer-aided applications

From reader reviews:

Martin Sanchez:

Inside other case, little people like to read book Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine). You can choose the best book if you love reading a book. Provided that we know about how is important the book Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine). You can add information and of course you can around the world by a book. Absolutely right, due to the fact from book you can understand everything! From your country until foreign or abroad you will find yourself known. About simple issue until wonderful thing you are able to know that. In this era, you can open a book or maybe searching by internet unit. It is called e-book. You need to use it when you feel bored to go to the library. Let's study.

Gerald Sosa:

The actual book Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine) will bring you to the new experience of reading a book. The author style to describe the idea is very unique. When you try to find new book to see, this book very suitable to you. The book Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine) is much recommended to you to learn. You can also get the e-book from your official web site, so you can quicker to read the book.

Robert Collado:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your time to upgrading your mind talent or thinking skill also analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your short space of time to read it because all of this time you only find guide that need more time to be learn. Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine) can be your answer given it can be read by anyone who have those short extra time problems.

Randal Gore:

On this era which is the greater particular person or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple way to have that. What you should do is just spending your time very little but quite enough to have a look at some books. One of many books in the top record in your reading list is definitely Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine). This book that is certainly qualified as The Hungry Hills can get you closer in becoming precious person. By looking right up and review this e-book you can get many advantages.
