## **First Outline of a System of the Philosophy of Nature (Contemporary Continental Philosophy) (SUNY Series in Contemporary Continental Philosophy) F. W.J. Schelling**

Appearing here in English for the first time, this is F. W. J. Schelling's vital document of the attempts of German Idealism and Romanticism to recover a deeper relationship between humanity and nature and to overcome the separation between mind and matter induced by the modern reductivist program. Written in 1799 and building upon his earlier work, *First Outline of a System of the Philosophy of Nature* provides the most inclusive exposition of Schelling's philosophy of the natural world. He presents a startlingly contemporary model of an expanding and contracting universe; a unified theory of electricity, gravity magnetism, and chemical forces; and, perhaps most importantly, a conception of nature as a living and organic whole."
