The Amazing Science Fair Project (Project Kids Adventures) (Volume 3) Gary M Nelson PMP

Amanda was terrified. Sure, she and her friends had built a huge tree house and an awesome haunted house together - but now she was in way over her head. Those projects had been for **fun** - but this one was going to be **marked!** She and her lab partners have to do a class project for the School Science Fair - but they have absolutely no idea where to start or even what to do. Have they finally met their match? Meanwhile, the boys had big problems of their own, and the outcome of their project could mean life or death! OK, maybe not actual death, but they could end up cold, wet and hungry, and with no electronics...for a *whole weekend!* Join the Project Kids in their third big adventure as they come together to unravel the mysteries of Mice, Men...and Marshmallows. **Parent/Teacher Note:** In this next adventure, the skills the Project Kids learned on their first two big projects are reinforced and expanded as the girls and boys separate to work on distinctly different projects. The book will also cover some practical steps and strategies to plan, research, run experiments and report on findings for a Science Fair project.
