Markus Asper

Writing Science (Science, Technology and Medicine in Ancient Cultures) Markus Asper

Scientific and technological texts have not played a significant role in modern literary criticism. This collection, focusing mostly on medical and mathematical texts from ancient Greece, aims at approaching ancient Greek science from the cross-disciplinary perspective of authorship. Among the questions addressed are: How does scientific writing differ from 'literary' writing? In what ways does the author present himself as an authoritative figure? In addition to offering a new approach to this vast area of ancient literature, this collection reflects on the forms of scientific and scholarly communication current today.
