**C++ Concurrency in Action: Practical Multithreading** Anthony Williams

## Summary

*C++ Concurrency in Action* is a reference and guide to the new C++ 11 Standard for experienced C++ programmers as well as those who have never written multithreaded code. This book will show you how to write robust multithreaded applications in C++ while avoiding many common pitfalls.

## About the Technology

Multiple processors with multiple cores are the norm these days. The C++11 version of the C++ language offers beefed-up support for multithreaded applications, and requires that you master the principles, techniques, and new language features of concurrency to stay ahead of the curve.

## About the Book

Without assuming you have a background in the subject, *C++ Concurrency in Action* gradually enables you to write robust and elegant multithreaded applications in C++11. You'll explore the threading memory model, the new multithreading support library, and basic thread launching and synchronization facilities. Along the way, you'll learn how to navigate the trickier bits of programming for concurrency.

Written for C++ programmers who are new to concurrency and others who may have written multithreaded code using other languages, APIs, or platforms.

Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

## What's Inside

- Written for the new C++11 Standard
- Programming for multiple cores and processors
- Small examples for learning, big examples for practice

=====

## Table of Contents

1. Hello, world of concurrency in C++!
2. Managing threads
3. Sharing data between threads
4. Synchronizing concurrent operations
5. The C++ memory model and operations on atomic types
6. Designing lock-based concurrent data structures
7. Designing lock-free concurrent data structures
8. Designing concurrent code
9. Advanced thread management

## 10. Testing and debugging multithreaded applications

### **From reader reviews:**

#### **Anthony Powell:**

This C++ Concurrency in Action: Practical Multithreading are reliable for you who want to be described as a successful person, why. The reason of this C++ Concurrency in Action: Practical Multithreading can be one of the great books you must have is actually giving you more than just simple reading through food but feed an individual with information that might be will shock your previous knowledge. This book is handy, you can bring it everywhere you go and whenever your conditions at e-book and printed types. Beside that this C++ Concurrency in Action: Practical Multithreading giving you an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we realize it useful in your day activity. So , let's have it and luxuriate in reading.

#### **Robert Monson:**

Reading a reserve can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new info. When you read a publication you will get new information since book is one of various ways to share the information as well as their idea. Second, examining a book will make anyone more imaginative. When you reading through a book especially fictional book the author will bring someone to imagine the story how the figures do it anything. Third, it is possible to share your knowledge to others. When you read this C++ Concurrency in Action: Practical Multithreading, you can tells your family, friends and soon about yours reserve. Your knowledge can inspire average, make them reading a publication.

#### **David Hoag:**

C++ Concurrency in Action: Practical Multithreading can be one of your basic books that are good idea. We all recommend that straight away because this book has good vocabulary that can increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The article author giving his/her effort to get every word into joy arrangement in writing C++ Concurrency in Action: Practical Multithreading but doesn't forget the main stage, giving the reader the hottest and also based confirm resource details that maybe you can be one among it. This great information can easily drawn you into brand new stage of crucial contemplating.

#### **Jose Said:**

Reading a book to be new life style in this calendar year; every people loves to examine a book. When you read a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you would like get information about your examine, you can read education books, but if you want to entertain yourself read a fiction books, such us novel, comics, in addition to soon. The C++ Concurrency in Action: Practical Multithreading will give you a new experience in studying a

book.
