Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics)

Harvey Checkoway, Neil Pearce, David Kriebel

This widely used text provides a clear and critical summary of research approaches to the epidemiological study of workplace hazards. It describes the historical development of occupational epidemiology, methods for characterizing occupational exposures, and techniques for designing and implementing epidemiologic studies in this area. The relative strengths and limitations of various study designs for investigating specific health outcomes are emphasized. Also included are more advanced discussions of statistical analysis, exposure and dose modeling, and subsequent applications of data derived from epidemiologic research, as in meta-analysis, pooled analysis, and statistical analysis, exposure and dose modeling, and risk assessment. Since the first edition was published 15 years ago, there have been numerous advances in epidemiologic methods to accommodate a broadened scope of investigations of occupational exposures and associated adverse health outcomes. Thus, in this Second Edition the authors have updated their discussions of methodology to include such topics as case-cohort and case-crossover designs and statistical analysis of repeated measures data, and have expanded the examples they use throughout the book to demonstrate the applications of these methods to a wide range of acute and chronic health outcomes. They have also added a new chapter on occupational health surveillance. Their text is unique for its strong emphasis on the definition and assessment of exposures, the application of quantitative exposure data to epidemiologic models, and the recognition that improvements in workplace risk identification and quantification will come from careful integration of these approaches. This fine volume will serve both as a textbook for courses on occupational epidemiology and as a practical handbook of the design, implementation, and evaluation of research in this field.

From reader reviews:

Robert Johnson:

Reading a e-book can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new information. When you read a publication you will get new information because book is one of many ways to share the information or maybe their idea. Second, reading through a book will make you more imaginative. When you looking at a book especially hype book the author will bring you to imagine the story how the personas do it anything. Third, it is possible to share your knowledge to other people. When you read this Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics), you may tells your family, friends and soon about yours e-book. Your knowledge can inspire the others, make them reading a book.

Lucy Nelson:

The particular book Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) has a lot details on it. So when you make sure to read this book you can get a lot of help. The book was published by the very famous author. The writer makes some research prior to write this book. That book very easy to read you can obtain the point easily after perusing this book.

Jeffrey Martinez:

This Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) is great guide for you because the content which is full of information for you who all always deal with world and also have to make decision every minute. This specific book reveal it details accurately using great coordinate word or we can say no rambling sentences inside it. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only provides straight forward sentences but difficult core information with beautiful delivering sentences. Having Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) in your hand like obtaining the world in your arm, information in it is not ridiculous just one. We can say that no book that offer you world throughout ten or fifteen tiny right but this book already do that. So , this really is good reading book. Hey there Mr. and Mrs. stressful do you still doubt in which?

Jessie Davis:

Don't be worry when you are afraid that this book will probably filled the space in your house, you might have it in e-book approach, more simple and reachable. This kind of Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) can give you a lot of pals because by you looking at this one book you have factor that they don't and make you actually more like an interesting person. This kind of book can be one of one step for you to get success. This reserve offer you information that possibly your friend doesn't know, by knowing more than additional make you to be great men and

women. So , why hesitate? Let us have Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics).
